DETAILED ACTION

1. Claims 138-274 are presented for examination.

Election/Restrictions

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1: figures 3, 6 [claims 156-167 and 168-179] drawn to controlling the vehicle based on braking pressure and torque.

Species 2: figures 9 and 10 [claims 180-83 and 184-187] drawn to determining distance between motor vehicles.

Species 3: figure 12 [claims 188-196 and 197-205] drawn to filtering an unprocessed speed signal.

Species 4: figures 13-14 [claims 206-215 and 216-225] drawn to low-pass filtering a nominal speed signal.

Species 5: figure 23 [claims 226-232 and 233-241] drawn to adjusting nominal brake pressure.

Species 6: figure 32 [claims 242-248 and 249-250] drawn to releasing a transition of longitudinal movement of the motor vehicle.

Species 7: figure 38 [claims 251-254 and 255-258] drawn to a nominal tracking acceleration.

Species 8: figures 31-32 [claims 259-262 and 263-270] drawn to a nominal separation.

Species 9: figures 34-35 [claims 264-265 and 271-274] drawn to a speed correction.

3. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Species 1: claims 156-167 and 168-179;

Species 2: claims 180-83 and 184-187;

Species 3: claims 188-196 and 197-205;

Species 4: claims 206-215 and 216-225;

Species 5: claims 226-232 and 233-241;

Species 6: claims 242-248 and 249-250;

Art Unit: 3661

Species 7: claims 251-254 and 255-258;

Species 8: claims 259-262 and 263-270;

Species 9: claims 264-265 and 271-274.

The following claim(s) are generic: Claims 138-146 and 147-155.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: they are related to patentably different species lacking unity of invention not so linked as to form a single general inventive concept.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
